

# IUOE - EPA-608 Course

Are you ready to learn more? Visit: <https://www.iuoe.org>

*Working on today's cooling systems is.....more challenging than ever:*

Familiar refrigerants are being eliminated

Climate change is a growing concern

Regulatory requirements are tougher

**Most of all, you must pass the appropriate EPA certification exam before you can even work on cooling systems.**

## IUOE has the course for you!

The Core unit includes:

Review of cooling systems

Safe handling of refrigerants

How refrigerants interact with ozone

Regulatory requirements

Proper procedures...and more.

Whether you're seeking Core, Type I, Type II, Type III, or Universal certification, The IUOE CFC course can help prepare you for the EPA exams.

Each of the remaining units—Type I, Type II, and Type III—contains a single lesson focused exclusively on what you need to know for that Type.

This course is a "blended" course. In addition to your classroom time, we've made everything available online so you can **review and refresh anytime, anywhere!**

Taking tests is never easy. *Prepare for the exams, and boost your confidence, with the IUOE's newly revised course on CFC's.*
